

## Hexagon Challenge: The Era of the Great Depression

### Challenge: Level 1:

Cut out the hexagons. (No this is not the challenge!)  
Each hexagon needs to be in contact with at least one other hexagon but it must only touch hexagons that it connects/links with.  
Stretch your diagram across two pages or use additional paper. A3 is on my desk.

### Challenge: Level 2:

Add explanations in writing for why you have linked some of the hexagons together.  
Eg: evidence your thinking.

### Challenge: Level 3:

As above.

Plus take a blank hexagon sheet and add some hexagons of your own. Use your prior learning (in your books D'oh) to help you.
